Investment Risk Disclosures

Different types of investments involve varying degrees of risk. Therefore, it should not be assumed that future performance of any specific investment or investment strategy will be profitable.

Asset allocation may be used in an effort to manage risk and enhance returns. It does not, however, guarantee a profit or protect against loss. Performance of the asset allocation strategies depends on the underlying investments.

Please remember that it remains your responsibility to advise MFA, in writing, if there are any changes in your personal/financial situation or investment objectives for the purpose of reviewing/evaluating/revising our previous recommendations and/or services, if you would like to impose, add, or to modify any reasonable restrictions to our investment advisory services.

Email Disclosures

MFA often communicates with its clients and prospective clients through electronic mail (“email”) and other electronic means. Your privacy and security are very important to us. MFA makes every effort to ensure that email communications do not contain sensitive information.
